

World Charting REPORT

using *Integrated Pitchfork Analysis*

by Dr Mircea Dologa, MD, CTA

MORNING of April 21st – 2008

The traders must progressively monitor the conditions of the market movements that validate or invalidate the recommended forecasts. The market forecasts of this study have a very high probability, but they might not be exact. An astute trader always trades the market behaviour, not only the forecasts. *Go with the market, let it be your guide and never impose anything on its behaviour.*

Our research strongly suggests a “top-down” market analysis rather than other procedures. In our opinion, the performed studies with *Cash Index* data are more illustrative than those with *Futures Index* data. However, due to our *Futures* trading preferences, we will use every time, the most adequate data, for that specific traded vehicle.
